

Cable drum unreeling frame

CODE: 107010

Couple of cable drum unreeling frames
Allows the reel to be rotated in place and cables to be unwound quickly.
Consists of a steel frame with white galvanized finish with two aluminum sliding rollers pivoted on ball bearings.
One of the two rollers is movable and can be moved to 4 different positions, depending on the diameter of the reel to be unwound.
Suitable for rotating reels:
from Ø 400 to 1000 mm max. weight: 600 kg
from Ø 1000 to 1200 mm max weight: 750 kg
Frames weight: 15 kg
Execution: white galvanizing
Supplied with spacer bar to keep the 2-skid assembly locked.
