

High polymer fishtape BLU TWISTY

CODE: BLU TWISTY
FOR THREADING IN CONDUITS

Fishtape consisting of 3 twisted polyester wires, self-lubricating, with special "spiral" section, diameter 5.2 mm.

Able to reduce friction, as it minimizes the contact surface of the fishtape with the walls of the pipe to be threaded, or with the wires already in the pipeline. fishtape terminals are made of M5 threaded brass, allowing easy interchangeability of various accessories.

Features

- no electrical conductivity
- ideal for threading into conduits up to Ø 200 mm
- blue color
- great pulling power
- interchangeable flexible starting spinner and pulling with eyelet
- high flexibility
