

Amplifier 1 channel

CODE: SLV401

Signal amplifier for single channel dimmers of the NTG series with voltage output up to 12A and power supply range from 8 to 53V DC

- Designed for regenerating a live PWM input with output up to 12A.
- It allows to regenerate the PWM signal also using a supply voltage different from the input one.
- Control inputs: PWM x1
- Synchronous outputs: PWM x1
- PWM signal repeater
- Protected against voltage spikes
- PWM dimmer frequency: 390Hz
- Operating temperature: -20 + 50 ° C

8-53V IP20

Technical data

Article	Volt	Max power	Current	Size (mm)	N. output
SLV401	8÷53V DC	576W (48V)	12 A	40x80x24	1
