

High polymer fishtape HURRICANE

CODE: HURRICANE

Fish tape in polymer plastic material, selflubricating, with special "single spiral" section, diameter 4.5 mm.

Able to reduce friction, as it reduces to the minimum the contact surface of the fish tape with the walls of the pipe to be drawn, or with the cables already in the duct. Furthermore, single wire construction increases stiffness. The fish tape terminals are in M5 threaded brass and assure easy interchangeability of the various accessories.

Features

- Ø 4,5 mm.
- ideal for drawing in small diameter pipes: 20-25 mm
- glossy orange
- M5 threaded terminals
- with interchangeable flexible perforated tip starting spinner and pulling loop with eyelet
- no electrical conductivity

Technical data

Article	Length
4819.10	10 m circa
4819.15	15 m circa
4819.20	20 m circa
4819.25	25 m circa
