

## Spray foam Speedly Spray

### CODE: SPEEDLY SPRAY

Innovative product for easier insertion and sliding of fish tape and cables in ducts.

The same formula as the traditional and appreciated SPEEDLY in a new foaming form.

The foam dispensed inside the ducts is pushed by the propellant also in rising sections, in curves and the most hidden gaps, thus drastically decreasing friction points.

When the cable runs through the foam it is entirely lubricated enhancing smooth laying and preserving the outer coating from friction.

The spray foam is suitable for pipes with maximum diameter 40 mm.

The new 400 ml spray can is fitted with double spraying system: direct or through the straw for easier insertion of the foam even in curves or small-sized pipes.

Non-toxic for humans and environment
